AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION (1999 EDITION)

CHECKLIST AS AT 1 JANUARY 2001

On l July 1999, the Australian Harmonized Export Commodity Classification (AHECC) was reissued incorporating all changes since the AHECC was first issued on 1 January 1988.

This checklist records the revision status of the odd-numbered pages of the AHECC which have been revised since 1 July 2000. The checklist should be used to ensure that the latest available AHECC page is included in your copy of the classification. Changes to the AHECC are indicated by an asterisk in the margin.

Against each page number below is shown the revision status of the 2000 reissue as at 1 January 2001 (eg 1 denotes 1st revision etc).

INSTRUCTIONS FOR COMPLETING EXPORT ENTRY - HEADER SCREEN OR COVER PAGE (FORM B957)

Each of the following instructions relates to a field on the Export Entry. The numbers shown beside the export entry fields as shown below do not necessarily relate to the item numbers of the fields on an export entry. Copies of manual Export Entry forms are included at the end of this Section.

Senders Reference

Enter the reference assigned to the consignment. The reference **must be unique** to the particular consignment and cannot be used for any other consignment. To amend the declaration the reference **must be input exactly** the same as the original.

Type of Exporter

There are three recognised types of exporters. They are:

- (N)on-confirming
- (C)onfirming
- (M)ultiline

Confirming exporters and Multiline shippers must be registered as such with the Australian Customs Service to use those facilities.

Owner/Agent (for export entries lodged via EXIT only)

Input "O" if the EXIT user is the owner of the goods to be exported.
Input "A" if the EXIT user is acting as an agent on behalf of the owner for the purpose of lodging export entries.

Excisable/Customable

Customable/Excisable goods are goods which would be subject to Customs or Excise duty if they were to be delivered into home consumption rather than being exported. If the goods are customable/excisable, show "Y" in this field and show the establishment code of the warehouse or excise premise from which the goods were removed in the Excise Establishment Code. If the goods are not customable/excisable goods, show "N" in this field and leave the Excise Establishment Code blank.

Excise Establishment Code

This field should only be input if the goods are excisable or customable. Input the excise premise or warehouse code from which the goods are to be removed.

Owner's ABN Name

If the party lodging an entry is not the owner e.g. an agent, input the owner's Australian Business Number (ABN) of the owner of the goods. The ABN must be prefixed with "ABN=" eg "ABN=1234567891234". If the owner has no ABN, the owner's name must be quoted. No owner name should be quoted if an ABN is supplied.
Note: This field is not required for exporters lodging their own export entries via the EXIT system.

Owner Phone

If the party lodging an entry is not the owner eg, an agent, enter the owner's phone no (including area code).
Note: this field is not required for exporters lodging their own export entries via the EXIT system.

Consignee Name

The name of the person or organisation who takes final physical possession of the goods. This should be the principal, not a bank, freight forwarder, etc, acting on behalf of the principal.

Consignee City

The city/town in which the person or organisation who takes final physical possession of the goods is located.

Country of Final Destination

This is the code for the country of final destination of the goods at the time of shipment.

Do not enter the code for the country where the goods are to be discharged for subsequent shipment to the country of final destination. For example, goods exported to Kuwait via Singapore should appear as "KUWA" not "SING".

Exceptions are:

ship and aircraft stores for foreign (ie, other than Australian) registered ships and aircraft - enter "SHIP".

destination unknown - enter "UNKN". When details of the country of final destination are subsequently established, submit an amending Export Entry.

Port/Airport of Loading

For shipments by **sea,** this is the Australian port at which the goods are loaded onto the ship transporting them out of Australia. For shipments by **air**, this is the airport at which the goods are loaded onto the aircraft transporting them out of Australia.

Where a port/airport is declared an 'appointed port' under s15 of the *Customs Act* but doesn't have a valid port code, the closest port with a valid port code to the port of loading should be used.

Any port/airport that is not an appointed port cannot be used as a place of export.

Goods **trans-shipped** within Australia prior to export should be shown as having been loaded at the port or airport where they were loaded onto an international carrier that is to export the goods from Australia. For example, goods trans-shipped from Hobart to Melbourne for subsequent export from Melbourne should be shown as having been loaded in Melbourne, even if the Export Entry is lodged in Hobart.

For exports by **post,** enter the Post Office from which they are despatched.

Port/Airport of Discharge

The foreign port at which the ship/aircraft transporting the goods from Australia will discharge them. This may not necessarily be the final destination of the goods.

If **trans-shipment** is to occur, this will be the first port or airport of discharge. For example, for goods exported to Kuwait **via** Singapore, **the port of discharge** will appear as "SINGAPORE" but the **country of final destination** will appear as "KUWA".

For ships' or aircraft stores show "SHIP" as the port of discharge.

Invoice Currency

Only the currency used on the invoice needs to be entered here. See A/02 of this manual for the codes that should be used.

Total F.O.B. Value

[NOTE: For a definition of Free-on-Board (F.O.B.), see instructions for the **F.O.B. Value** later in this section.]

The sum of the values of all commodities as recorded on this Export Entry. It must be in the same Currency as the FOB values entered on the Line Screens or Goods Page. Note that for parties lodging annual export entries all values must be in Australian dollars.

Mode of Export

The three methods of export are:
- Ship   = S
- Air   = A
- Post   = P

Where goods are not exported as consigned cargo (i.e. commercial goods carried in hand luggage, goods exported via Australia Post or ship or aircraft stores), the mode of export should be specified as "P".

Intended Date of Export

The anticipated date of departure of the ship or aircraft from the port of loading, or the date of postage.

Ship/Aircraft Identify Code (Lloyd's No./Registration No.)

For ship and aircraft stores only. Enter the Lloyd's No. for ships and the Registration No. for aircraft.

Total No. of Full Container Load (F.C.L.) Containers [For exports by sea only]

If the type of container is FCL, the number must be greater than zero. If the type of container is other than FCL (i.e. LCL or non containerised), input 0 (zero).

Number of Packages

For sea consignments:
- input 0 (zero) if the consignment is FCL, a bulk shipment or live animals
- input the number of packages in all other instances.

For air consignments:
- input the number of packages.

INSTRUCTIONS FOR COMPLETING AN EXPORT ENTRY - LINE SCREENS OR GOODS PAGE (FORM B957(a))

A separate lines screen (for export entries lodged via EXIT) or goods page (for manual export entries) must be provided for each different commodity (ie, item with a different AHECC) from each different state of origin.

Commodity Classification (AHECC) Code

Input the classification code for the goods as specified in the AHECC Manual. For details on the determination of the correct statistical item for a commodity, see Part 1 of the AHECC Manual. If you experience difficulty in determining a classification, please telephone a Customs Information Centre on 1300 363 263.

The same AHECC may be input more than once. There is no need to consolidate lines with the same AHECC. Goods with the same AHECC but different export scheme or State of origin codes may be listed on up to 99 lines, where necessary.

Origin Code

This is the Australian State or Territory in which the final stage of production or manufacture occurs. The codes to be used are:

N-	New South Wales	T-	Tasmania
V-	Victoria	X-	Northern Territory
Q-	Queensland	C-	Australian Capital Territory
S-	South Australia	F-	Goods of foreign origin, re-exported
W-	Western Australia		

The following examples should assist in attributing the correct origin code:

- Minerals in ore and concentrate form (eg iron ore and concentrate) should be attributed to the State in which they were mined. Metals (eg iron and steel ingots) should be attributed to the State in which they were processed.

- Operations which leave the goods essentially unchanged (ie repair, blending, packaging, bottling, cleaning, sorting, husking and shelling) should not be considered as stages of production or manufacture.

- Goods which are imported and re-exported in the same condition as they arrive, or after undergoing repair or minor alteration (ie, **re-exports),** should be shown as "F" indicating goods of foreign origin.

- Goods assembled from parts previously imported from overseas, where the end product does not resemble the component parts, should be attributed to the State in which the assembly took place.

- Where a "raw" product is brought into Australia specifically for processing and re-export, the value added should be attributed to the State of processing, whilst the "raw" input should be attributed to the State of origin for re-exports (ie, 'F').

Goods Description

Input the specific invoice or trade description of the goods. Descriptions used in the AHECC should be used only if identical with invoice or trade descriptions.

Net Quantity

The quantity (in terms of the units prescribed in the AHECC) and the unit of quantity must be specified here (quantity details are not required if the unit of quantity shown in the AHECC is "NR",
ie, not recorded).

Metallic assays are required for some items in addition to the standard quantity. These items are so indicated in the AHECC.

Where quantity is to be expressed by weight the net weight should be used ie, any outside packages, inner containers or wrappings or any carrying medium (eg liquid) surrounding the goods should be excluded. However, for goods in solution or emulsion, or similar forms, the quantity should be the total weight of the contents, including the liquid.

Units

Input the unit for the net quantity as specified in the AHECC.

Gross Weight

The gross weight for goods on this line of the export entry. Shipments of 100,000 kg (100 tonnes) or more may be shown in tonnes.

The gross weight is in effect the shipping weight of the goods. It should include the weight of any immediate packaging but not the weight of standard international containers. It should also include any material added to the goods for transportation purposes, eg, water sprayed onto coal to prevent explosions in transit, water added to wood chips to facilitate loading and unloading.

Where the gross weight for each commodity is unavailable, an estimated gross weight should be used. The total of such estimates should equal the actual gross mass of the consignment.

Unit of Gross Weight (KG or T-Tonne)

Input "KG" if the gross weight is measured in kilograms or "T" if it is measured in tonnes.

Container Type

This is only required where the mode of export is sea (S). The three codes which may be input are:

- F = Full Container Load
- L = Less than a full container load
- N = Non-containerised goods such as bulk cargo.

Coal, Thermal Use Indicator

This field is no longer used and should be left blank.

Element

This field only appears if the AHECC code indicates the goods require an assay. Input the chemical symbol of the element. The elements requiring metallic assays are:

- Copper (Cu)
- Gold (Au)
- Lead (Pb)
- Nickel (Ni)
- Platinum (Pt)
- Silver (Ag)
- Tin (Sn)
- Tungsten (WO_3)
- Zinc (Zn)

Assay Details

This field is only required if the AHECC code indicates that the goods require an assay. Input the content (as a percentage) of each element as determined by the assay.

Container No.

This field is not mandatory but should be input if the details are known, particularly if the goods require a permit.

If more than one container number is to be input enter 'Y' in the "MORE" field.

Seal Number

The details for this field should be input where possible.

Permit No.

Input the relevant Permit Issuing Agency (PIA) prefix and permit number with **no spaces** between the two.

e.g. PIM123456

If there is more than one (1) permit number to be input, eg, a PIH permit number and an AHC permit number, then the second permit details must be recorded on a second line in the Permit Number Field.

e.g.   PIHI123456
        AHC7898Q

A list of PIAs and their prefixes are contained in Chapter 8 of the EXIT Procedural Manual.

Permit Encryption

Input the permit encryption, if required, as supplied by the permit issuing agency.

Export Scheme Code

Indicate whether the following export concessions apply:

> Drawback (DRB)
> Tariff Export Concession (TEXCO)
> Motor Vehicle Plan (MVP).

F.O.B. Value

This is the 'free on board' value of the goods. The FOB point of valuation is the point where goods are placed on board an international carrier at the border of the exporting country. The FOB value should include production costs up until placement on the international carrier, but exclude international insurance and transport costs.

Exporters who do not know the value of the goods at the time of shipment and enter an approximate value must subsequently submit an amending entry providing the correct FOB value. This approximate FOB value must be corrected before the exportation of the goods unless the exporter is a Confirming or Multiline exporter.

Users of the manual form (B957 and B957a) must express the FOB values in Australian dollars.

For Export Entries being lodged through the EXIT system:

- If the invoice currency is Australian Dollars, US Dollars, Japanese Yen, British Pounds, German Deutschmarks, Euro Dollars or New Zealand Dollars, FOB values must be entered in terms of that currency.
- If the invoice currency is not one of the six foreign currencies listed above, FOB values must be converted and quoted in Australian dollars.

F.O.B. Currency

The currency in which the FOB values have been reported. For example if the invoice currency is US dollars (one of the seven currencies mentioned above), FOB values should be reported in US dollars. However, if the invoice currency is Italian Lira, FOB values should be reported in Australian dollars.

EXIT users can report FOB values in one of seven major currencies when lodging an export declaration - Australian Dollars, US Dollars, Japanese Yen, British Pounds, German Deutschmarks, Euro Dollars or New Zealand Dollars. Conversion of FOB value by the exporter (or agent) is only required when the invoice currency is not one of these seven major currencies.

The Australian Bureau of Statistics (ABS) has developed a currency conversion program that uses representative exchange rates supplied by the Reserve Bank of Australia to standardise the conversion of the six major non-Australian FOB currencies to Australian Dollars, based on the confirmed date of departure of the shipment concerned. The ABS would prefer that where invoices have been completed in one of these six major non-Australian currencies, that the export declaration be completed using the currency and FOB details as recorded on the invoice.

Declaration (Manual entry only)

This is a declaration by the person responsible for the Export Entry, that the details reported are an accurate representation of the goods exported in this consignment.

Before signing, please ensure that all goods included in the consignment have been reported and that the Export Entry has been completed accurately.

The full name of the person making the declaration and the date and place of issue should be included on all copies of the Export Entry. The usual signature of that person is required on the original copy only. If signed by an authorised agent, then the agent's full address should be shown.
